Professional quality products

Asfir's variety of products are the perfect solution for accessorizing the off road vehicle.

ATL Winch Bumper

The innovative ATL winch bumper is designed and developed to replace the original bumper. The bumper covers the winch but is not attached to it. ATL bumpers are characterized in low weight and in keeping close proximity to the vehicle's original contour lines.

Side Protectors

Protect the lower side of the vehicle and aid recovery with a jack. Designed by Asfir's research and development team and manufactured using the most up-to-date technology.

The side protectors are made of quality metal and can be combined with aluminum side steps.

Towing Device

A quality detachable towing device mounted to the vehicle's chassis under the original bumper.

Skid Plates

Quality skid plates for off road vehicles with one of the highest design, performance and finish standards in the world. Asfir offers various skid plates that provide an overall protection to the vehicle's underbody parts such as fuel tank, front and rear axel, steering rod and gear.

The skid plates are made of quality aluminum and are screwed to original holes in the vehicle. Service openings in the skid plates enable servicing the vehicle without dismantling the plates.

4x4 accessories

Asfir has a wide variety of accessories such as suspension seats, roll bars, front "A" bumpers recovery kits, compressors, Hi Lift jacks, recovery straps, shackles, pulley blocks and ratchets.
